Edimar Ferla

Senior Systems Engineer | AI Multi-Agent Architect | Full-Stack |
Telecom Innovation
Curitiba, Paraná, Brazil

Summary

Senior Systems Engineer focused on building AI-powered systems, with 15+ years of experience in telecom and software engineering across global companies such as Minsait, Claro, and Nokia Siemens.

My career started in mission-critical telecom network operations, where I built deep expertise in transmission systems (DWDM, SDH, IP, and mobile networks) and complex problem-solving. Over the years, I transitioned into software engineering, focusing on building scalable and intelligent solutions.

Currently, I specialize in:

- AI Multi-Agent Systems and intelligent automation
- Full-stack development (from design to delivery)
- Telecom systems and network optimization
- Integration of AI into real-world enterprise environments

I have hands-on experience developing AI-based multi-agent systems integrated with development environments, enabling advanced automation, code generation, and intelligent workflow orchestration.

I am driven by innovation, continuous learning, and delivering solutions that create real business impact. Currently, I apply AI in practice to increase productivity, automate complex tasks, and build more intelligent and autonomous systems.

I am always open to connecting and discussing AI, telecom, and next-generation system architectures.

Experience

Minsait

Senior Systems Engineer

December 2025 - Present (7 months)

Curitiba

- Design and develop intelligent solutions combining software engineering and AI
- Build and apply multi-agent systems to automate development workflows and problem-solving
- Develop full-stack applications and system integrations in enterprise environments
- Contribute to digital transformation projects for telecom and large-scale clients

EFFE DIGITAL

Technology and Digital Marketing Consultant

January 2025 - July 2025 (7 months)

New York, USA

- Led the design and implementation of digital solutions for companies and entrepreneurs
- Developed custom applications and integrated systems to optimize business processes
- Structured and improved digital workflows with focus on scalability and operational efficiency
- Designed and executed performance-driven digital marketing strategies
- Conducted market analysis and implemented targeted, data-driven campaigns
- Automated communication workflows and provided consulting support for continuous improvement
- Applied best practices in technology, innovation, and digital transformation

Minsait

System Engineer

July 2023 - January 2025 (1 year 7 months)

Curitiba, Paraná, Brasil

- Developed and supported software solutions in global consulting projects
- Worked on system integration, automation, and technical problem-solving
- Collaborated across teams to deliver scalable and efficient solutions

Claro Brasil

10 years 8 months

Backbone Technician Senior

June 2021 - July 2023 (2 years 2 months)

Curitiba, Paraná, Brasil

- Operated and optimized large-scale telecom networks (DWDM, SDH, IP, Mobile)
- Ensured high availability and performance of critical infrastructure
- Diagnosed and resolved complex network issues in mission-critical environments
- Led operations and maintenance across regional telecom systems

Telecommunications Specialist

December 2012 - June 2021 (8 years 7 months)

Cascavel, Paraná, Brasil

- Operated and maintained large-scale mobile networks (2G, 3G, 4G) across western regions of SC and PR
- Managed and supported transmission technologies and equipment including DWDM, SDH, MW, IPRAN, TX, and NodeB
- Ensured high availability and performance of mission-critical telecom infrastructure
- Diagnosed and resolved complex network issues in critical environments
- Performed preventive and corrective maintenance to maintain continuous network operation
- Contributed to network optimization and continuous performance improvement
- Supported regional operations with a focus on stability, efficiency, and service quality

Nokia Siemens

Technical Support Consultant

December 2009 - August 2012 (2 years 9 months)

Curitiba, Paraná, Brasil

- Managed and resolved technical incidents for large telecom operators across Brazil
- Acted as a key interface between customers and L2/L3 technical teams
- Provided L1 and L2 support for BSS (Business Support Systems)
- Diagnosed and resolved issues in GSM and WCDMA networks
- Coordinated software upgrades in critical telecom environments
- Performed KPI analysis and supported network optimization initiatives
- Developed scripts to support automation in GSM environments
- Supported regional operations and changes across South America

Claro Chile S.A.

Telecommunications Technician

November 2007 - November 2009 (2 years 1 month)

Temuco, Araucania, Chile

- Provided technical support and operational activities in BSS systems (Nokia Siemens Networks)
- Integrated software and hardware across platforms such as RNC, BSC, TRAU, and BTS
- Coordinated software upgrades for critical telecom equipment
- Performed line measurements, air interface analysis, and protocol analysis
- Contributed to mobile network optimization initiatives
- Operated and maintained telecom infrastructure across a large geographic region
- Developed scripts, technical documentation, and support databases

Siemens S.A.

Telecommunications Technician

January 2005 - July 2007 (2 years 7 months)

Curitiba, Paraná, Brasil

- Provided technical support and operations for telecom BSS systems
- Performed fault analysis and troubleshooting in critical network environments
- Conducted line measurements and performance testing
- Coordinated software and hardware upgrades for telecom equipment
- Contributed to early nanoGSM trials for major telecom operators in Brazil
- Supported system integration in dynamic and complex environments

Education

Universidade Positivo

Bacharelado, Ciência da Computação · (January 2022 - December 2025)

Instituto Adventista Paranaense

Ensino Técnico, Processamento de Dados · (January 1999 - December 2001)
